M e t h o d o l o g y & L o g i s t i c s

Study Sample

- A total of 700 randomly selected Canadian citizens, 18 years of age and older were interviewed in a survey commissioned by Pollution Probe.

Survey Method

- The survey was conducted using computer-assisted techniques of telephone interviewing (CATI) and random number selection. A total of 20% of all interviews were monitored and the management of Oraclepoll Research supervised 100%.

Logistics

- The surveys were conducted between the days of October 15th and October 21st, 2004. Initial calls were made between the hours of 6:00 p.m. and 9:00 p.m. Subsequent callbacks of no-answers and busy numbers were made on a (staggered) daily rotating basis up to 7 times (from 10:00 a.m. to 9:00 p.m.) until contact was made. In addition, telephone interview appointments were attempted with those respondents unable to complete the survey at the time of contact. If no contact was made at a number after the seventh attempt, the number was discarded.

Confidence

- The margin of error for the 700-person survey is $\pm 3.7\%$, 19/20 times.

Executive Summary

Top of Mind

Respondents were first asked what they felt was the most important environmental issue facing Canada at this time.

Water and water quality (15%) topped the list of environmental issues that voters felt were the most important ones facing Canada at this time. The next most cited group of responses related to climate change (11%) and included issues such as the Kyoto protocol, global warming and green house gasses.

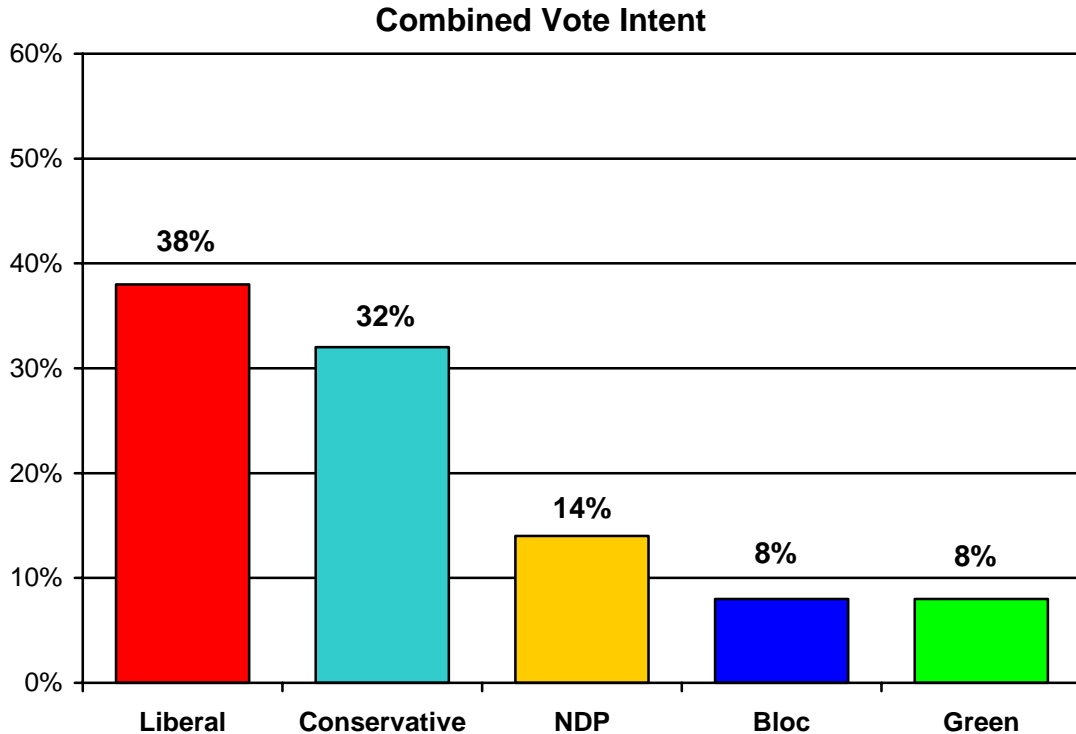

A total of 10% of responses related to air pollution, 9% pollution in general, 8% waste management, 6% forestry issues such as clear cutting and 4% car pollution.

A total of 26% of those interviewed either did not know or had no opinion.

Vote Intent

Q2a. If a federal election was held today in Canada, which party's candidate running in your Riding would you most likely vote for?

Q2b. If a federal election was held today in Canada, which party's candidate would you, be leaning towards?

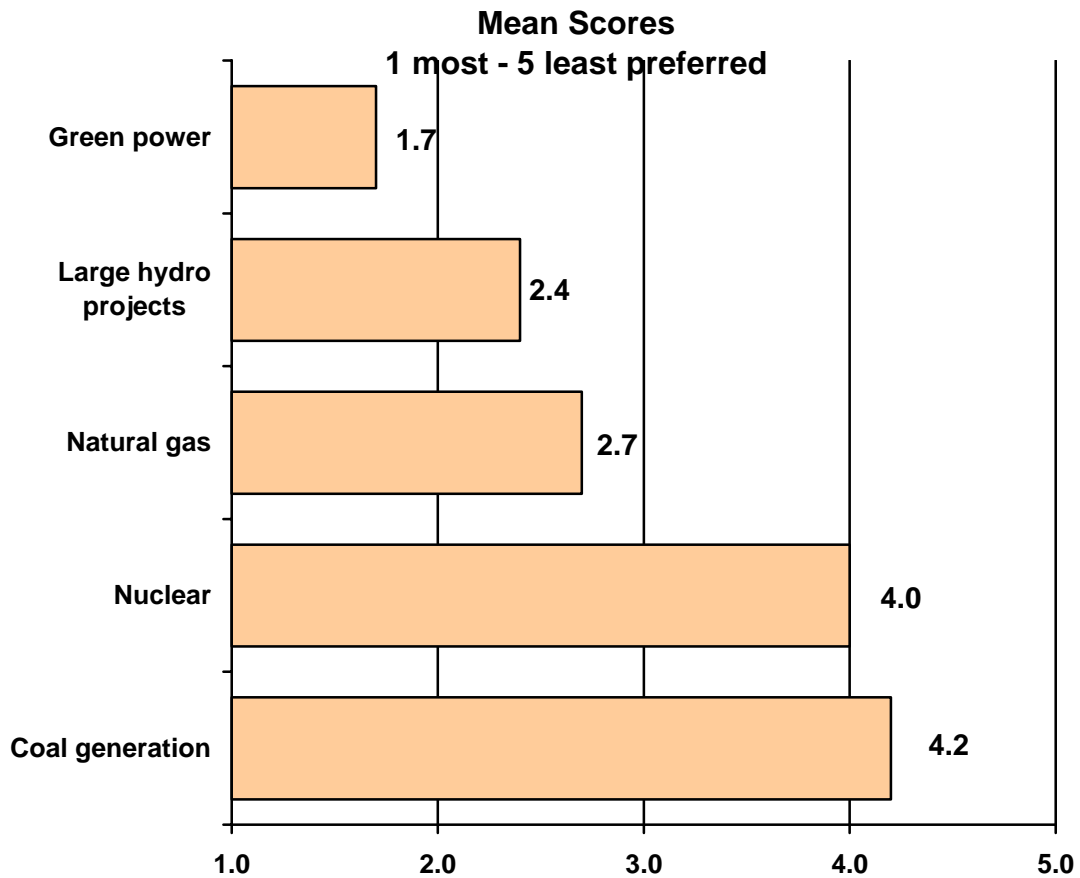

If a federal election were held, the Liberals would be backed by 38% of decided voters, while the Conservatives would be supported by 32%. The NDP trail with 14% and the Green's and Bloc each have the backing of 8% of voters. 7% of the electorate was undecided at the time of the interview.

A high 88% of Canadians stated that the issue of clean air was either important or very important to them as a voter. A lesser 68% stated that climate change was important or very important to them as a voter, 10% felt it was unimportant, 19% had a neutral opinion and 3% did not know.

Power Sources

Respondents were asked to rank in order of priority preference each of five possible sources of electrical power. They were asked not to take cost into consideration.

Green power was by far the most preferred power source among voters as 60% named it as their favored option. The next most preferred were hydro where 20% stated it as their first choice and natural gas (15%), while the least favored options were nuclear (5%) and coal (1%) generation.

Green Power

When asked what they thought of when hearing the term green power, 16% stated alternate energy or power sources, 11% said environmentalists, 9% wind power, 6% the Green Party and 6% the environment. 5% named a greener or cleaner environment, 5% protecting forests, 2% a good idea and 2% less pollution. In total, there were slightly more than one-quarter of comments that related to alternative forms of energy, while 27% of respondents said that nothing came to mind or that they did not know.

“Overall would you say that you support or oppose the use of green power as a source for electricity in Canada?”

There is strong support for the use of green power among 87% of voters surveyed. In addition, when asked how much they would be willing to pay on their monthly electricity bill to reduce improve air quality, 12% stated up to \$2, 18% \$2-\$5, 22% \$5-\$10, 9% \$10-\$15 and 17% \$15-\$20. Only 17% said nothing and 5% did not know or had no opinion.

Green Power – Importance & Benefits

Respondents were asked how important each of the following benefits of green power were to them.

<i>“How important are each of the following possible benefits of green power to you?”</i>	Total Important & Very Important
Improving air quality	91%
Preventative health care – reducing the number of cases of asthma & other respiratory diseases	88%
Helping Canada to reduce emissions that cause climate change	85%
Improving the reliability / security of your electrical power supply	76%
Providing local jobs & benefits to your local economy	75%

While all areas were of high importance, those that rated the strongest were improving health care, followed by preventative health care and helping to reduce emissions.

Working Towards Green Power

“How important do you feel it is that the federal and provincial governments work together to develop green power sources in Canada over the next 20 years? Please use a scale from one not at all important to five very important.”

Almost nine in ten voters (89%) were of the opinion that it is important or very important for federal and provincial governments to work together to develop green power sources in Canada over the next 20 years.

Eight in ten (80%) Canadians interviewed also stated that they would be more likely to support a party that backed an aggressive green power initiative. Only 10% would be less likely and 10% were undecided. NDP (91%) and Green (91%) voters were the most likely to back such a party, followed by those that support the Bloc (84%), the Liberals (82%) and Conservatives (77%).

Results by Question

Q1. First of all which issue do you feel is the most important environmental issue facing Canada today that you would like the new federal government and parliament to deal with?

	Valid Percent
Valid Don't know / none	25.6
Water quality / water pollution	14.8
Kyoto / global warming / green house gasses	11.1
Air quality / air pollution	9.7
Pollution (Not specified)	8.8
Waste management / garbage / recycling	8.0
Tree cutting / clear cutting	6.3
Car pollution	3.7
Gas / fuel shortage	3.1
Energy	2.6
Natural resources	2.0
Wildlife	1.7
Selling our water	1.1
Mad cow disease	.9
Pesticides	.6
Total	100.0

Q2a.If a federal election was held today in Canada, which party's candidate running in your Riding would you most likely vote for?

	3	40.9
	4	13.4
	Least important	4.2

How important are each of the following possible benefits of green power to you? Please respond using a scale from one being not at all important to five very important.

Q8.Improving the reliability / security of your electrical power supply

		Valid Percent
Valid	Not at all important	2.8
	Not important	3.4
	Neither important nor not important	17.4
	Important	20.2
	Very important	55.3
	Don't know	.9

Q9.Providing local jobs and benefits to your local economy

		Valid Percent
Valid	Not at all important	2.8
	Not important	4.6
	Neither important nor not important	14.8
	Important	21.7
	Very important	53.6
	Don't know	2.6

Q10.Improving air quality

		Valid Percent
Valid	Not at all important	.3
	Not important	1.7
	Neither important nor not important	6.3
	Important	17.4
	Very important	73.8
	Don't know	.6

Q11.Preventative health care - reducing the number of cases of asthma and other respiratory diseases

		Valid Percent
Valid	Not at all important	.9
	Not important	2.0
	Neither important nor not important	8.8
	Important	15.1
	Very important	73.2

Q12.Helping Canada to reduce emissions that cause climate change

		Valid Percent
Valid	Not at all important	1.4
	Not important	3.1
	Neither important nor not important	9.4
	Important	19.9
	Very important	65.2
	Don't know	.9

Q13. How important do you feel it is for the future, that the federal and provincial governments work together to develop green power sources over the next 20 years? Please use a scale from one not at all important to five very important.

	Valid Percent
Valid Not at all important	1.7
Not important	1.7
Neither important nor not important	7.1
Important	14.0
Very important	75.2
Don't know	.3

Q14. As a voter, would you be more or less likely to support a political party that backed an aggressive green power initiative?

	Valid Percent
Valid More likely	80.3
Less likely	9.7
Don't know	10.0

Q15. How much extra would you be willing to pay on your monthly electricity bill to add green power to the energy mix in order to improve air quality?

	Valid Percent
Valid None	16.8
Up to 2\$	12.3
2\$ up to 5\$	18.2
5\$ up to 10\$	22.2
10\$ up to \$15	8.8
\$15 to 20\$	17.1
Don't know	4.6
