THIS EVENING'S SPEAKER

The Honourable Lawrence Cannon, Minister of Transport, Infrastructure and Communities

Lawrence Cannon is a first-time Member of Parliament and was elected to the House of Commons in 2006.

Between 2001 and 2005, Mr. Cannon served as a city councillor in Gatineau. He was appointed president of the Société de transport de l'Outaouais in 2002 and in 2004 he was named president of the Association du transport urbain du Québec.

Mr. Cannon's political involvement at the city level was preceded by a brief period when he was a consultant in the private sector.

He was a member of Quebec's National Assembly from 1985 to 1994. Mr. Cannon held the posts of Deputy Speaker of the National Assembly and Minister of Communications in Premier Bourassa's government.

Mr. Cannon holds a Bachelor of Arts in political science from l'Université de Montréal and a master's in business administration from l'Université Laval.

THE MASTER OF CEREMONIES

Rob Maclsaac, Chair, Greater Toronto Transportation Authority

As the first Chair of the Greater Toronto Transportation Authority (GTTA), Rob Maclsaac is responsible for leading a Board of Directors to plan, prioritize and integrate transportation systems across the Greater Toronto Area and Hamilton.

During his term as Mayor of the City of Burlington, Mr. Maclsaac became well-known for his regional approach and progressive growth management ideas for the Greater Golden Horseshoe.

As a member of the Ontario Smart Growth Panel, he led the effort to develop a vision and recommendations for a Smart Growth Strategy for Central Ontario. These elements remain fundamental tenets in the Province's Places to Grow Plan.

Subsequent to this work, Mr. Maclsaac chaired a provincial task force that established the founding principles for a permanent Greenbelt for the Greater Golden Horseshoe. The Greenbelt Plan preserves more than 1.8 million acres of forest, natural lands and farmlands in one of the most populous regions in the country. In May 2004, he accepted the Canadian Urban Institute's Urban Leadership Award on behalf of the Task Force.

THE DINNER ENTERTAINMENT

Slow Monday began inauspiciously about five years ago in a basement laundry room, as a group of friends with varied and inconsistent musical talents, pathetically reliving their glory days as wanna-be rock stars. They shared an enthusiasm for having a few beers and making a little noise on Sunday nights after they'd put their kids to bed — hence the origin of the band's name.

Under the fearless leadership of former Burlington Mayor and Greater Toronto Transportation Authority Chair, Rob MacIsaac, the band has gone on to perform in support of charitable causes at festivals and events in the GTA and southern Ontario.

Tonight they have culled a transportation theme set from their now substantial repertoire of classic rock. Today the band has ten members, many of whom fortunately have respectable day jobs.

THE DOOR PRIZE

Bushnell Instant Replay™ Digital Imaging Binoculars

A serious, high-performance binocular with a dual personality. The Instant Replay can record 30 second video clips on its 16 MB removable card, allowing you to capture and review sports action on the 1.5" LCD screen right after it happens. Or, you can take high-quality digital photos. This is essential gear for team coaches and scouts, birders and wildlife observers, hunters and anyone who enjoys recording photographs or movies. Now you can easily view, download, edit and keep your favorite movie clips or stills. Powerful, (8 x 32mm) easy-to-use and loaded with advanced features, the Bushnell® Instant Replay binocular sets the standard for excellence in image-capturing binoculars.

POLLUTION PROBE'S TRANSPORTATION PROGRAMME

Pollution Probe's Transportation Programme was established to find solutions to the environmental impacts associated with transportation activities in Canada. Whether traveling by plane, ship, train, truck or automobile, the burning of fossil fuels to power our vehicles — both large and small — creates emissions that can pollute the air we breathe and contribute to changes in the earth's climate system.

As Canada's population has increased and the amount of personal and commercial traffic has swelled, emissions from the transportation sector have increased steadily. Today, one-quarter of Canada's greenhouse gas emissions come from transportation sources, including road vehicles, air travel and marine. Half of this amount is from personal vehicles alone (cars, minivans, pickups and SUVs). Transportation is also a sector that is projected to be impacted by climate change, with the opening of the Northwest Passage and lower water levels in the Great Lakes.

There has been a rapid rise in greenhouse gas emissions from the movement of goods and freight in Canada. The Climate Change and Transportation Programmes at Pollution Probe are organizing a national conference in the New Year to review the factors driving these emissions trends and to identify the actions needed. New emissions standards for trucks are also being phased in to reduce air pollutants,

and the voluntary agreement between the Railway Association of Canada and the Government of Canada to monitor and reduce locomotive emissions has been renewed. Pollution Probe sits on both the Management and Technical Review Committees to this agreement.

To reduce emissions from personal vehicles, Pollution Probe's Motor Vehicle Fuel Efficiency Project has been working to support the establishment of national fuel efficiency standards, along with a comprehensive package of complementary measures to increase consumer demand for fuel efficient vehicles. Pollution Probe has also partnered with the Canadian Automobile Association on a new Eco-Mobility Plan in support of programmes that enable drivers to take action, conserve fuel and reduce emissions.

To further reduce emissions from personal vehicles, Pollution Probe will continue to support cleaner commuting options in the Greater Toronto Area by advocating for improved public funding for public transit and for Smart Growth, and through campaigns such as the annual Clean Air Commute™.

SILENT AUCTION ITEMS

Masters Course for Four at Lionhead Golf Club, donated by Newalta

Rick Nash autographed Columbus Blue Jackets jersey, donated by Imperial Oil

Sunoco Ultra 94 gasoline — coupons for gas worth \$500 plus 10 Ultra Wash coupons

Two First Class VIA Rail Canada roundtrip tickets, Quebec City — Windsor corridor

Raptors vs. Orlando Magic, Feb. 20, 2008, Loge Suite for 8, donated by Umbra

Raptors vs. Detroit Pistons, Jan. 4, 2008, Platinum Lounge tickets for 6, donated by Unilever

Please note that Silent Auction bidding will close promptly at 9:00 pm.

Shell Canada gift-certificate
(includes Tree Canada Carbon
Credits)

Car Safety Kit and Family Safety Kit for your home, donated by Ontario PowerGeneration

One monthly pass from GO Transit

lululemon  **athletica**

Yoga/Pilates mat, donated by lululemon athletica

THE TRANSPORTATION AFFAIR IS ILLUMINATED BY LED TECHNOLOGY AND IS CARBON NEUTRAL

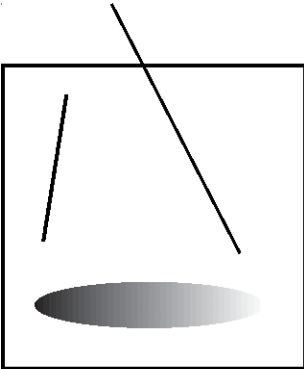

Bullfrog Power is proud to support the 2007 Annual Pollution Probe Gala Dinner — The Transportation Affair. Clean, carbon-free green power will be injected onto the Ontario grid to match the amount of electricity used this evening. All of the electricity injected on behalf of the Pollution Probe Gala will be sourced exclusively from wind and low-impact water power producers in Ontario who meet or exceed the federal government's EcoLogo(M) standard for renewable energy.

Homes, businesses, organizations and events are reducing their environmental impact by making the switch to clean, green electricity from Bullfrog Power. You can too — Switch today at www.bullfrogpower.com.

ONTARIO POWER GENERATION

For the second year running, Ontario Power Generation has generously donated carbon dioxide emission reduction credits to make your travel to and from this year's Pollution Probe Gala carbon neutral. Carbon neutral means that the greenhouse gas emissions associated with the Gala will be offset by OPG's investments in greenhouse gas emission reduction projects.

WESTBURY
NATIONAL
SHOW SYSTEMS

Westbury National is proud to be doing its part to reduce power consumption through its industry leading use of LED lighting on Architectural projects around the globe including the recent re-lighting of Toronto's CN Tower. Tonight's event is being lit in part with energy efficient LED lighting. LED lighting not only reduces energy consumption 10 fold over conventional sources, its long life expectancy and recyclable components helps keep landfill to a minimum.

A MESSAGE FROM THE PRIME MINISTER OF CANADA

PRIME MINISTER · PREMIER MINISTRE

I am pleased to extend my warmest greetings to everyone attending the Pollution Probe 2007 Gala Dinner at the historic Fairmont Royal York Hotel in Toronto.

Improving the environment and health of Canadians is one of the priorities the government established for this session of Parliament in the Speech from the Throne. Canada is moving aggressively by implementing mandatory reductions in emissions of air pollutants and greenhouse gases, and by implementing a new water strategy to clean up our waterways.

One of the hardest challenges facing this large, sprawling nation is our dependence on the automobile. This evening's theme of "Get Around — The Transportation Affair" provides an ideal opportunity to discuss solutions to Canada's tailpipe emissions. I am glad that you have invited my good friend, the Honourable Lawrence Cannon, to speak to you. He has taken up this challenge and is advancing Canada's efforts on alternative fuels and public transit. I know we both look forward to working with Pollution Probe and all Canadians to secure a healthy global environment for future generations.

Please accept my best wishes for a productive and memorable evening.

OTTAWA
2007

A MESSAGE FROM THE ENVIRONMENT MINISTER OF CANADA

Minister of the Environment

Ministre de l'Environnement

Ottawa, Canada K1A 0H3

Greetings from the Minister of the Environment

I am pleased to provide greetings to everyone attending this evening's Pollution Probe 2007 Gala Dinner.

I am sure you will take this opportunity to meet and discuss the opportunities that we all face in ensuring a healthy environment for Canadians. As this evening's official invitation reads, "The point of this affair is to get everyone talking", and that is a most laudable goal.

As Minister of the Environment, I believe that protecting the environment and the health of Canadians is one of the highest priorities for our Government. That is why we have taken action with our Chemicals Management Plan, which will build on Canada's position as a global leader in the safe management of chemical substances and products. We also have introduced the Air Quality Health Index, which will provide specific information to Canadians who are 'at-risk' from air pollution and to the general public.

We have invested millions in public transit, taken action in promoting bio-fuels and alternative energy sources, and provided \$1.5 billion to provinces to spur green technology development. In addition, our Turning the Corner plan will fight greenhouse gas emissions and air pollution at the same time. Canada is one of the only countries in the world that are seeking to tackle both of these challenges at the same time.

We look forward to continuing our work with Pollution Probe now and in the future. I appreciate the opportunity to provide greetings to the Gala and please accept my best wishes for an enjoyable evening.

Sincerely,

A handwritten signature in black ink that reads "John Baird".

John Baird, P.C., M.P.
Minister of the Environment

A MESSAGE FROM THE PREMIER OF ONTARIO

The Premier of Ontario - Le Premier ministre de l'Ontario

November 20, 2007

A PERSONAL MESSAGE FROM THE PREMIER

On behalf of the Government of Ontario, I am very pleased to extend warm greetings to everyone attending Pollution Probe's 38th Annual Gala Dinner Fundraiser.

Our government remains committed to working with our partners to protect our air, water and green spaces, and to ensure that Ontarians have an environment that is healthy and communities that are strong. That is why I am delighted to recognize the hard work and dedication shown by Pollution Probe in its work to achieve real environmental change.

Cleaning up our air, protecting our water and cracking down on polluters require commitment and collaboration from business, industry, government and community groups. Being green takes effort and discipline, but I am confident that, together, we can find positive, practical solutions to Ontario's environmental challenges.

I commend Pollution Probe and the distinguished guests from the corporate, academic and scientific communities for their dedication to ensuring a sustainable future for our province. And I applaud everyone here tonight for your support of this very worthy cause.

I would also like to thank the organizers and volunteers who have devoted time and energy to making this year's event possible. Please accept my best wishes for an enjoyable gala and a highly successful fundraiser.
